

If you are a member of WCA/GAA/Lognet/EGLN/IFC8 but have not entered into an AGENCY AGREEMENT with AWS, we cannot work with your company so **we will not respond** due to the high mail traffic that is vital to our existing agents.

All World Shipping (AWS) is the only approved and neutral NVOCC working in conjunction with WCA/GAA/Lognet/EGLN/IFC8. As a member of WCA/GAA/Lognet/EGLN/IFC8 you are entitled to use the AWS HBL and the AWS rates.

If a member of WCA/GAA/Lognet/EGLN/IFC8 and would like to become an agent you can register to become AWS agent by download the Agency Agreement from <http://allworldshipping.com/agreement/>. Sign and upload the file back to us. It is easy. After receiving your completed application, we will activate your WCA user ID and password for access to AWS. There is no fee for joining AWS! You only pay us a small fee if you issue our online HBL. Our fees are posted on our website and are the same worldwide.

As an AWS agent, you can:

- Issue AWS FMC approved **on-line HBL** which is accepted worldwide including the U.S. The AWS HBL is always covered by USD 1 million of legal liability and errors & omissions insurance.
- Access our **service contracts** and our net/net rates on our website 24/7. The rates in AWS service contracts are never marked up. You can go to our website, login and click **CONTRACTS** and then select **SERVICE CONTRACTS** then the list of our current contracts will appear. However, AWS service contract does not have a space guarantee. You need to work with the local shipping line to get space and booking.
- **File AMS** with U.S. Customs in AWS system as is required for all ocean shipments to the U.S.
- **File AFR** with Japan Customs in AWS system as is required for all ocean shipments to Japan.
- **File ISF5** with U.S. Customs in AWS system as is required for shipments to Canada/Mexico via U.S.
- **Create NRA** to comply with FMC requirement in AWS system as is required for shipment to/from USA.
- Secure copies of our bonds, our U.S. NVOCC OTI license and other important shipping documents.
- **Spot Rate Negotiation**: You can also try to get spot rates from Maersk and ONE using AWS NVOCC# in their online request. We will issue LOA to you. Please advise if you want to know more.

AWS HBL can be created online at your office. With your company name at the signature area of AWS HBL, you can print, sign and stamp your company seal on it and then release it to your client. AMS also can be submitted to U.S. customs using AWS system with live AMS status, you can check 24/7 online. And You can consign your shipment under AWS HBL to any of your preferred destination agent.

If you have any further questions about AWS and our benefits, please ask us and we will be pleased to assist.
