What are NRAs?

NRAs are written and binding arrangements between a shipper and a licensed NVOCC to provide specific transportation service for a stated cargo quantity, from origin to destination, on and after receipt of the cargo by the NVOCC on a stated date or within a defined time frame.

When you are using the AWS HBL for shipment to and from USA, you need to create the NRA in AWS's website. AWS will document all the sell rates in accordance with the regulations of the U.S. FMC.

The terms of the NRA must be agreed to by both your client and you (as an agent of AWS), *prior* to receipt of cargo. The shipper is considered to have agreed to the terms of the NRA if the shipper:

- (1) Provides you with a signed agreement;
- (2) Sends to you a written communication, (ie. email), indicating acceptance of the NRA terms; *or*
- (3) Books a shipment after receiving the NRA terms from you.
